Source and assets
Code, assets, build scripts
F1
Intake
SDKs, engines, partner deliveries
F2
Release builds
Tier A: ephemeral
Tier B: persistent
F3
Signing
Keys in hardware or managed service
F5
Agents and bots
Bounded by the trust of inputs
F8
Partners
Scoped access that expires
F9
Build caches
Release lane reads only its own entries
F4
platform boundary
Players
Install the update
Platform
Re-signs or distributes
Store upload
Dedicated account; a person sets live
F6
Provenance check
Verified before any upload
F7
